Survival Analysis

Welcome to GIST Phosphoproteomics Analysis Platform

Platform Overview

This platform provides comprehensive phosphoproteomics analysis tools for GIST (Gastrointestinal Stromal Tumor) research. Explore phosphorylation patterns, clinical associations, and survival outcomes.

Phosphorylation Query

Search and analyze phosphorylation sites for specific proteins

Clinical Analysis

Compare phosphorylation levels across various clinical features

Survival Analysis

Kaplan-Meier survival analysis based on phosphorylation patterns

AI-Powered Analysis

This platform includes AI-powered image analysis capabilities. Generate plots and receive intelligent biological insights and clinical interpretations automatically.
